

DooDoo Voodoo works — even on areas where you've previously used other products that failed. If you've tried disinfectants, bacteria-based products, enzyme-based products or home remedies, but haven't gotten the results you hoped for, you'll love DooDoo Voodoo. Its nontoxic & biodegradable "green" ingredients vaporize the sources of odors, leaving behind nothing but a temporary hint of a fresh, citrus scent.

DooDoo Voodoo is a proprietary mixture of all-natural* domestic and imported ingredients. We painstakingly blend them to an exacting formula that yields vastly superior results compared to all those other products that claim to eradicate pet odors, but actually don't. DooDoo Voodoo's ingredients are safe for use around people & pets,* and tolerated well even by those who've been bothered by other products. Great on most stains, too!

- Highly effective at deterring pets from resoiling.
- Works so well that it can often salvage "trashed" carpet & pad you might otherwise have to replace.
- Great on carpet, upholstery, hardwood floors, tile, countertops, clothing, car interiors (incl. spilled milk), etc.
- Can be sprayed directly on cat litter to extend its life between changes. Great for deodorizing litter boxes.
- Kills many common germs in as little as 5 minutes.

DooDoo Voodoo is sold in two forms: RTU (ready-to-use, pre-blended) and Concentrate (to which you add your own tap water). Concentrate costs less per application than RTU, and each quart of Concentrate makes enough RTU to fill the sprayer bottle up to 64 times (depending on dilution ratio). Nothing's more affordable than DooDoo Voodoo — not even close.

DooDoo Voodoo is in daily use at vet clinics and animal care facilities, successfully eradicating odors that bleach and veterinary-use-only chemicals fail to remove. **Try DooDoo Voodoo today. You'll absolutely love it!**

NOTE: Up to the limit allowed by federal tax laws, proceeds from the sale of DooDoo Voodoo are used in the fight against pet overpopulation and to help improve needy animals' lives, so you're getting a superior product *and* supporting a very worthy cause at the same time. Thank you for your help.

As with any behavior change in your pet, inappropriate elimination should always be evaluated by your veterinarian to rule out a medical cause.

• DooDoo Voodoo Is Extremely Easy To Use

No blotting, vacuuming, covering with moist towels or injecting with hypodermic needles. Spray It, Leave It, Love It!™

• Really Versatile — It's Not Just For Carpet

Use it in your washer instead of laundry detergent. Deodorize your car. Clean your hardwood floors, countertops & lots more!

• No Harsh Chemical Smell Like Other Brands

Our slight, natural-citrus scent is tolerated well by people & pets. DooDoo Voodoo has no industrial-strength chemical smell or overpowering perfume fragrance. It does its job, then it's gone!

• Tons Of Benefits Vs. "Bacteria" Products & Even Works Where Other Products Have Already Failed

Unlike bacteria- & enzyme-based products, DooDoo Voodoo will still work great on an odor spot even if you've used other products or home remedies on it. You can use it with your heated carpet-cleaning machine instead of your usual solution, which is something bacteria & enzyme products don't do well with. Bacteria & enzyme products just don't last, but DooDoo Voodoo has a virtually unlimited shelf life. Nothing beats DooDoo Voodoo's features or value!

Product Advantages

Ready-To-Use Concentrate Qt. Gal.

Directions: Before beginning treatment, locate soiled areas visually or with the help of a DooDoo Voodoo Blacklight (it's way more effective than other brands at highlighting soiled areas because it emits the correct frequency of ultraviolet light). Once you fire up the blacklight, you might be surprised by the number of soiled areas that show up.

RTU DooDoo Voodoo: Apply directly from the bottle by pouring, spraying or, on hard, water-safe surfaces, wiping with a clean, soft towel dampened with DooDoo Voodoo. On hard surfaces you can let DooDoo Voodoo air dry or let it dwell 5-10 min., then wipe it up (especially on hardwood floors).

DooDoo Voodoo Concentrate: Pour ½ to 3 ounces of Concentrate (depending on your particular odor's severity) into the empty spray bottle, then slowly fill the spray bottle with warm water. Tip the bottle to the side as you add the water to minimize foaming, or you can add the water *first*.

Completely wet the area where the odor originates, ensuring that DooDoo Voodoo contacts ALL the offending waste. Remember that urine in carpet spreads out under the surface of the carpet in the pad & subfloor, so treat an area larger than the spot you see on the surface.

If odor remains after treatment, DooDoo Voodoo did not come in contact with all the waste, so re-treat, making sure to moisten a larger area. (Allow 48 hours or more for complete drying between treatments to get maximum odor neutralization.) In our experience, we've found that it's better to treat a spot twice with a weaker blend than once with a stronger blend, so we recommend you start with a ½oz.-per-quart ratio and strengthen your mixture from there as you deem necessary.
