

# Contains Self-Mixed RTU (ready-to-use) Doodoo Voodoo®

**Doodoo Voodoo works where other products fail. Salvages “trashed” carpet & pad.**

Doodoo Voodoo is easy to use, fantastic on both stains & odors, great with carpet & hard surface machines, made with mostly natural ingredients, contains no dyes or perfumes, and is definitely not persnickety like enzymes. There's no injecting with hypodermic needles, no blotting and no covering with moist towels or aluminum foil like other products recommend. **Just pour it, leave it, love it!**™

Plus, up to the limit allowed by federal tax law, proceeds help provide care for needy animals. So, purchasing Doodoo Voodoo is a win-win!

**Before You Begin:** Always gently shake the bottle before using. Never use Doodoo Voodoo Concentrate or SUPER Concentrate as-is; they **MUST** be mixed with water before being sprayed or poured. Once you add Concentrate or SUPER Concentrate to water, you have RTU (ready-to-use) Doodoo Voodoo.

**Suggested Dilutions:** For Concentrate, add between 1/2oz and 2oz per quart of warm water. For SUPER Concentrate, add between 1/4oz and 1oz per quart of warm water. Only mix in a CLEAN, NEW spray bottle or gallon jug. To reduce sudsing, it helps to fill your bottle with water first, then add your Doodoo Voodoo Concentrate or SUPER Concentrate. Once you add Concentrate or SUPER Concentrate to water, shake gently to blend before using.

**Directions:** On hard surfaces, you can apply by whatever means you desire (spray, pour,

mop on, wipe), then let Doodoo Voodoo air dry naturally or let it dwell up to 10 min., then gently wipe or mop up the excess or extract the excess with your hard surface cleaning machine.

On soft surfaces, apply by pouring or spraying, let dwell, then let air dry naturally or extract if desired. Be sure to wet the area of the stain or odor completely enough that Doodoo Voodoo contacts ALL the offending waste. Do remember that liquids (food, drink, vomit, urine, etc.) spread out to 3X or more the area you see on the surface, so be sure to treat a large enough area. In carpet, it helps to tamp (push) down with your shoe to help spread the Doodoo Voodoo deep into the backing, pad and subfloor.

Allow 48 hours or more of drying time to maximize odor neutralization; complete drying can take longer than you might think. We ask that you don't make a decision to re-treat too soon and that you please let the area dry fully first. Don't freak out if during the drying phase

if the odor seems to temporarily get worse. This is normal and no cause for concern.

If odor remains after treatment, there are only a few things that could be the cause. 1. Doodoo Voodoo did not come in contact with all the waste. You might need to expand your treatment area. 2. There may be soiled areas remaining in the room that you are unaware of and didn't treat. Look/sniff around. 3. The area hasn't fully dried. 4. You need a stronger mix.

If you do decide to re-treat, you may need to moisten a larger area or use a stronger dilution ratio.

For additional tips, testimonials, case studies, FAQs, safety information and more, please visit our website.

We encourage you to tell your friends, veterinarian, carpet cleaning professional and others about Doodoo Voodoo. Thanks for your support of our important animal-charity work!

**Precautions:** Do not take internally. Keep out of reach of children. Use with fresh air ventilation. Avoid skin contact by wearing disposable gloves and be sure to wash your hands after handling. Keep pets away from treated areas until the areas are dry to the touch. Seek immediate medical attention if reactions occur. Four On The Floor Pet Products, Inc., is not liable for incidental or consequential damages arising from use. The user of the product determines its suitability for any particular purpose. Always test on an inconspicuous area first.
